MADE IN USA

GENERAL INFORMATION

Aqua-Root Pellets can be applied with the AQUA-AID PROportioner system or similar applicator during hand watering and/or syringing. **Aqua-Root** Pellets are an excellent tool to be used after chemical applications that are required to be watered in. Apply throughout the year with no phytotoxicity to all types of turf grasses, annuals, and perennials.

One **Aqua-Root** Pellet will cover 2 to 5 average size greens, up to 25,000 ft² (2,322 m²). Apply **Aqua-Root** Pellets as needed.

Aqua-Root Pellets will dissolve within one hour at water pressures of 90 to 120 psi (620 to 827 kPa). The rate at which an individual **Aqua-Root** Pellet dissolves is determined by water quality, temperature, pressure and flow rates. **The flow of water through the PROportioner should follow the molded arrow.** Please note some applicators have the flow opposite the molded arrow.

DIRECTIONS FOR USE

Greens, Tees, Fairways, Lawns and Sports Turf

Insert one **Aqua-Root** Pellet, with container, into the PROportioner jar and use when hand watering and/or syringing. Apply once a week throughout the growing season. Soak hard-to-wet areas, quickly drying mounds, newly sodded areas and highly compacted areas.

Horticulture

Insert one **Aqua-Root** Pellet, with container, into the PROportioner jar and use when hand watering. Apply twice a month throughout the growing season.

AQUA-AID GUARANTEE

Aqua-Root Pellets come with a 100% money back guarantee. If you are not satisfied with Aqua-Root for any reason after trying the product at recommended rates, AQUA-AID, INC. will refund your money in full.
