FWY·ISP™

FAIRWAY INJECTABLE SOIL PENETRANT

FWY-ISP is a cost effective formulation of AQUA-AID® soil wetting agents designed to enhance the penetration and infiltration of applied water through irrigation systems. **FWY-ISP** is designed to treat water repellent areas and large brown out areas in fairways and/or mounds, as well as, hard to drain areas. **FWY-ISP** can also be incorporated into nutrient mixes to allow for more efficient delivery of applied nutrients.

FWY-ISP is compatible with all conventional irrigation systems or conventional ground spray equipment. Users should follow the instructions and technical information from equipment manufacturers.

FWY-ISP is non-ionic, non-burning and non-toxic to all types of turf grasses.

FWY-ISP is effective in irrigation systems at concentrations as low as one part per 200,000.

- Increases soil moisture and softens seed coat for better germination
- Uniform moisture and nutrient coverage
- Increases water infiltration and penetration
- Increases nutrient efficiency
- Reduces run off and evaporation of applied water and nutrients
- Money back guarantee

COMPOSITION

FWY-ISP is a non-toxic, non-ionic, non-flammable, non-corrosive and biodegradable water base formulation of surfactants and wetting agents.

Active Ingredients:
14% Non-ionic polyols
86% Water

FWY-ISP is available in 55 and 264 gallon (1000 L) recyclable containers.*

*Check with your distributor for availability.

APPLICATION RATES

Irrigation Injection

Apply 1 to 2 quarts per acre (3 to 5 L/ha) through the irrigation system monthly or as needed.

Fertigation Injection

Mix proportionately to liquid nutrients to apply 1 to 2 quarts per acre (3 to 5 L/ha) per month or as needed.

Overseeding

Apply 2 quarts per acre (5 L/ha) one week prior to overseeding. Immediately follow overseeding with a second application at 2 quarts per acre (5 L/ha).
